## EXPLANATORY NOTE

TABLE No. 1.—The figures in the Imperial Tables were compiled on the basis of the territorial divisions into which the Province is divided and took no account of the arbitrary divisions or Political Agencies into which the Province is apportioned for the purposes of administrative control. Provincial Table No. 1 has, therefore, been compiled to enable the area, population, etc., of each Political Agency and its constituent portions to be ascertained at a glance.

TABLE No. 2.—This table is subsidiary to Imperial Table XIII. It contains details, arranged alphabetically, of all the groups belonging to the indigenous tribes of the Province which were recorded at the time of the Census. Column 2 of the Table relates to the locality in which each group is to be found. The number of indigenous tribesmen enumerated in Regular Areas has not been included in the Table but has been exhibited in footnotes. In order to render the classification easily intelligible the various tribal groups have been printed in different kinds of type.

TABLE No. 3.—The distribution of each of the indigenous tribes by Districts and Tahsils is shown in this Table. It has been restricted to the Districts of Chāgai, Quetta-Pishin, Thal-Chotwāl and Zhob. Sufficient material was not available for the preparation of a similar table for Kalat and the Bolan. In the case of Las Bela and the Marri and Bugti country, the figures would have been more or less a repetition of those already appearing in Provincial Table No. 2, and they have, therefore, been omitted. The aggregate figures of each District have been placed first and those for each Tahsil afterwards.

As with Provincial Table No. 2 different type has been used in the case of the race, the tribe and each of its sub-divisions.

TABLE No. 5.—This Table is subsidiary to Imperial Table No. XV. Part A contains for Administered Districts the amalgamated figures of Parts 2 and 3 of Imperial Table No. XV, and shows, therefore, the District totals. Part B shows occupations by Towns.
